

IS YOUR DATA
SAFE?

MUTECARD
PROTECTING YOUR CONTACTLESS CARDS

THE MUTECARD SECURITY SHIELD

KEY ADVANTAGES

MOST PEOPLE ARE UNAWARE OF HOW EASY IT IS TO ACCESS THE DATA ON THEIR BANKCARDS, PASSPORTS, TRAVELCARDS, MANAGED-ACCESS CARDS, AND IDENTIFICATION CARDS.

MUTECARD OFFERS DEPENDABLE AND DURABLE SECURITY FOR:

- IDENTITY PROTECTION
- CARD SKIMMING PROTECTION
- FINANCIAL CARD DATAPROTECTION
- FRAUD PROTECTION

THE PROBLEM

Imagine that you are riding a city bus. A man enters and walks slowly to the rear of the bus. Without touching you or even looking at you, he steals all of the confidential data on your bankcard. He tips himself \$20 from your account and later sells the data to a criminal organization that sells it further. You never even notice that you have been electronically pickpocketed.

This is possible because your bankcards, passport, managed-access cards, and identification cards of all kinds are extremely vulnerable to skimmers, hackers, thieves, and electronic pickpockets. They only need to outfit themselves with a miniature scanner and logging device, equipment that can be bought easily online, and they can steal data and money, and compromise any high-security environment.

THE SOLUTION

CardLab solutions are simple and convenient, except for anyone wanting to pick your electronic pocket.

When you are near a card reader, CardLab's patented MuteCard, in your wallet or purse, sends out a scrambling signal that blocks your card's ability to communicate with the reader. Just tap the MuteCard when you are sure that the card reader is legitimate, and it activates your card. What's more, the MuteCard deactivation switch provides its own power with CardLab's patented self-generating power source.

The MuteCard conquers fraud, identity theft, and skimming of all types of NFC contactless cards including passports.

Protect your cards and the information they carry.
Order your MuteCard today from our webshop.
